hilarity

Phriends
Undisciplined
Evolution of stupidity
People know nothing
How can Santa Fe kill you
In SFI, no one knows anything
I'm gonna do this with no words
We are pattern-finding creatures
Those people are gonna die soon
Doing this kind of science is happy
I change fields every five years or so
I'm going to flip through this marvelous slide
By being here I honestly believe that you are saving the world

PERFECT POWER-LAW SCALING!

I call you and you call me back six months later, that defines a relationship

We'd rather find a tiger when there isn't

You know it with knowing

Your relationship with your wife is the same with socio-economics growth,
with no change it will collapse

Hurting chaos dance

Singularity is near

Profound is trivial?
