

Welcome

Randomness, Structure and Causality: Measures of Complexity from Theory to Applications

January 9-13, 2011

SANTA FE INSTITUTE

Questions?

Questions?

- Are there fundamental measures of complexity that can be applied across disciplines or are measures of complexity necessarily tied to particular domains?

Questions?

- Are there fundamental measures of complexity that can be applied across disciplines or are measures of complexity necessarily tied to particular domains?
- Are there general properties that any measure of complexity must have?

Questions?

- Are there fundamental measures of complexity that can be applied across disciplines or are measures of complexity necessarily tied to particular domains?
- Are there general properties that any measure of complexity must have?
- How is a system's causal organization, reflected in models of its dynamics and information processing, related to its complexity?

Questions?

- Are there fundamental measures of complexity that can be applied across disciplines or are measures of complexity necessarily tied to particular domains?
- Are there general properties that any measure of complexity must have?
- How is a system's causal organization, reflected in models of its dynamics and information processing, related to its complexity?
- How would scientific and engineering disciplines benefit from a better understanding of measures of complexity?

Questions?

- Are there fundamental measures of complexity that can be applied across disciplines or are measures of complexity necessarily tied to particular domains?
- Are there general properties that any measure of complexity must have?
- How is a system's causal organization, reflected in models of its dynamics and information processing, related to its complexity?
- How would scientific and engineering disciplines benefit from a better understanding of measures of complexity?
- Are there universal mechanisms at work that lead to increases in complexity or does complexity emerge for qualitatively different reasons in different settings?

Logistics

- Bus pickup 8:15AM, Tu-Th.
- Wine & appetizers reception today, 5pm, 1304 Hyde Park Road.
- Banquet Tuesday 7pm at El Farrol.
- Wednesday afternoon free for small group discussion or outdoor activities.

Results

- Proceedings: to be discussed during meeting.
- Working groups, grant applications or a follow-up workshop.
- Talks: Please give Jim or me your talk slides when they are ready, preferably in pdf format, to post on the conference website.
